Machinery Is Tool Of Production

The four material factors most important in the economic well-being of a nation are invention, population, natural resources and economic organization. This article is about the machines we invent in order to mould natural resources into usable products for our people, and to distribute the commodities.

With a world population so large the economists tell us we must strain our resources to feed all the people, we are under increasing compulsion to expand productivity. We can do so only by using machinery.

For a dramatic contrast between the efficiency of human labour and that performed by machines directed by men, look at the Great Pyramid and Boulder Dam. The pyramid contains 2,300,000 stone blocks, each weighing 2½ tons. Dr. W.M. White, a consulting engineer of Milwaukee, has figured out that it took

100,000 men over a period of 30 years to build it. Boulder Dam has 3½ million cubic yards of concrete, requiring the handling of ten million cubic yards of material. A power line 220 miles long brought electricity which was applied through machines by 5,000 men. The pyramid was built by slaves under a taskmaster's lash in 30 years; the dam was built by machines under the direction of skilled workmen in five years.

What has brought about the change from a slave society to one in which every worker may be the master of manufactured power equal to that of hundreds of men? Imagine the power to visualize what would result if this and that were put together; progressive skill in applying the forces of six basic principles of machines: the lever, the wheel, the pulley, the wedge, the screw and the inclined plane. The wooden scoop of untutored races developed through the ordinary spade to one with pneumatic attachment, and finally to a huge shovel with steel teeth that can gobble up a cartload of earth at one mouthful.

Miss Muriel Dixon Weds Mr. Alexander McMurray

A pretty wedding was solemnized recently in Central United Church, Calgary, when Miss Muriel Ruth Dixon, daughter of Mrs. William Dixon and the late Mr. Dixon of Carbon, became the bride of Mr. Alexander McMurray, son of the late Mrs. Mary McMurray of Calgary.

The early-evening double-ring ceremony was performed by Rev. Dr. Gerald B. Switzer.

Given in marriage by her youngest brother, Mr. Thomas Edward Dixon, the bride wore a tailored suit ensemble in navy blue, complemented by pink accessories. She wore as her only ornament the bridegroom's gift of pearl earrings, and a corsage of pink roses.

Miss Lillian Mae Dixon attended the bride, wearing a gray suit ensemble and a shoulder corsage of red roses.

Attending the bridegroom was his nephew, Mr. T. E. L. W. Jackson, and the usher was Mr. Anton J. Luindick.

Soloist was Mrs. Ellen Baker who sang "Because" during the signing of the register.

A reception was held in the Ranch Room where the toast to the bride was proposed by Mr. Edgar Lyle Jackson, brother-in-law of the bridegroom.

Mr. and Mrs. McMurray spent their honeymoon in Banff, and have taken up residence in Calgary.

Twenty-one were present at the Club 21 meeting held in the Anglican Church basement on Friday evening, November 16. Meeting dates for the winter season were set at the first and third Wednesday of each month. The next meeting will be held on Wednesday, December 5. Films will be shown and discussed.

The Carbon Branch of the Canadian Legion Monday evening nominated officers and executive for the coming year. Elections will be held at the December meeting scheduled for Monday, December 17.

It was decided to hold a card party in the Legion Hall Friday evening, December 7, at 8 p.m. Whist and bridge will be played. Fred Schmierer, Morris Switzer and Wilf Skerry were appointed the committee in charge. Admission is 35c per person and everyone is welcome to attend.

Grades VII and VIII realized \$9.50 for the Juitor Red Cross at their whist drive held Friday evening in the Carbon school. Prize winners were:

Ladies' high, Miss Anna Carlson; men's high, Merle Ohlhauser; ladies' consolation, Darleen Hecktor; men's consolation, Gerald Kary. Lunch was served after play was completed.

The Senior Group of Carbon United Church will hold a Bazaar, Tea and Sale of Home Cooking in the Carbon Scout Hall on Saturday, November 24, from 3 to 6 p.m.

Royal Couple
Were Charmed
By Montreal

World News In Pictures

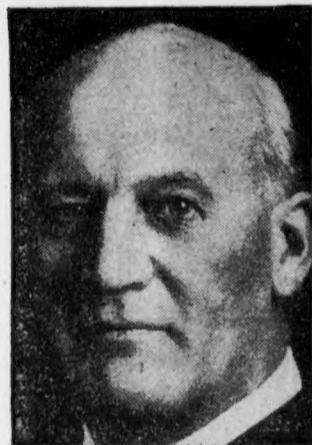

Brig. Rockingham's
Gift Really Hit
Home

ROYAL TOURISTS WERE CHARMED BY CANADA'S LARGEST CITY—Enthusiasm of Montreal crowds set back royal schedule one hour as Princess Elizabeth and Duke of Edinburgh carried out a 14-hour-day program, highlighted by a visit to McGill University and University of Montreal, two mammoth gatherings of school children in Molson stadium and visit to an aircraft plant. Climax of the eventful day was a full-scale state dinner attended by 1,200 citizens. During their stay in Montreal, royal couple visited Canada's largest shipyard, where the Duke showed a sailor's interest in this model ship, while Princess Elizabeth's glance strayed more than once to large group in attendance.—Central Press Canadian.

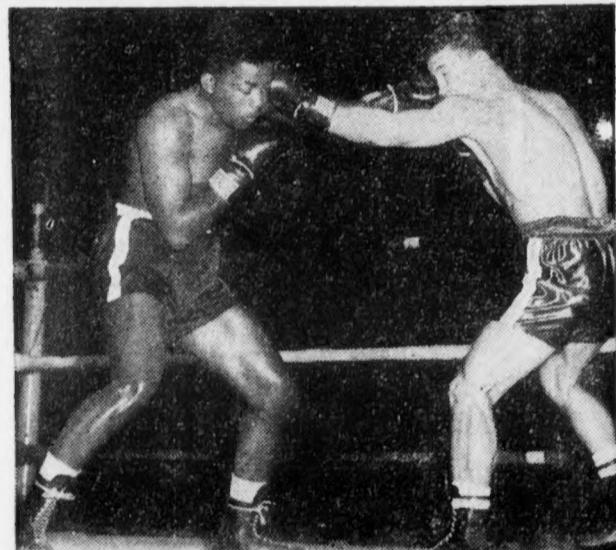

J. GERALD GODSOE

ROBERT A. BRYCE

LABOR TOP BOTTLENECK IN CANADA'S FINANCIAL FUTURE—Shortage of manpower and materials are two "bug-bears" marring Canada's financial landscape, according to industrial leaders attending 22nd annual "business parliament" of Canadian chamber of commerce, in Quebec City. However, among others, J. Gerald Godsoe, president of Toronto board of trade, and Robert A. Bryce, Toronto financier, foresee a bright financial future for Canada if increased immigration and development of Dominion's minerals and oil continues at present rate.—Central Press Canadian Photos.

'GENE "SILENT" HAIRSTON, (left), and Laurent Dauthuille shown at close quarters in the ninth round of their recent fight in Montreal, which Hairston won by a unanimous decision. The winner came close to scoring a knockout in the final round, the bell coming to Dauthuille's rescue.'

EX-PALESTINE MUFTI AN ATTENTIVE LISTENER—At a recent meeting of all Moslem parties, in Cairo, called into session to discuss the critical Egypt-Britain crisis, Haj Amin Al Husseini, the former Mufti of Palestine, with folded hands, is shown listening intently to one of the speakers, Markram Ebeld Pasha.—Central Press Canadian.

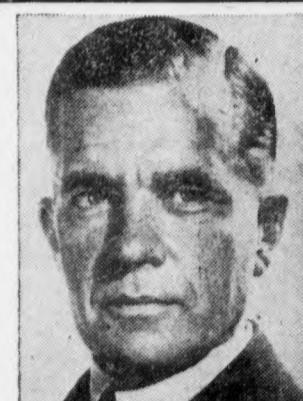

ROCKY'S "PRESENT" REALLY HIT HOME—Brig. J. M. Rockingham, commander of 25th Canadian infantry brigade group in Korea, took great pleasure in personally delivering a "present" to enemy troops on the other side of no-man's-land. The gift, the 100,000th shell to be fired by the 2nd regiment, Royal Canadian Horse Artillery, bore unsentimental message, "Present from Rocky, 2 R.C.H.A., 100,000 round." The gun crew, seen left to right: Bdr. Paul Cloutier, Kingston, Ont.; Gnr. Ira Childs, Lark Harbor, Newfoundland; Brig. Rockingham; L-Bdr. Del Johnson, Winnipeg, Man.; Gnr. Earl Dolson, London, Ont.; and Sgt. E. M. Evey Carleton Place, Ont., scored a direct hit on an enemy position.—Central Press Canadian.

—Central Press Canadian Photos.
LOST PRESIDENTIAL ASPIRATIONS—Although given slight chance of winning in the Argentine elections, these candidates lost to President Juan Peron, who was re-elected by a large margin. They are: Dr. Ricardo Balbin, (top), Radical Party leader, and Dr. Reynaldo Pastor, (bottom), Democratic Party standard bearer.

IT'S HARVEST TIME IN TRUCE ZONE—Oblivious to truce negotiations being held at nearby Panmunjom, these Korean farmers continue their daily work at harvesting their rice crop. At top, a Korean soldier stands guard as a helicopter flies in U.N. negotiators for one of the recent armistice sessions.—Central Press Canadian.

AIR MARSHAL Sir Basil Embry, top man in R.A.F. Fighter Command landed in Montreal recently to start a brief Canadian and U.S. tour.

GIVEN TOP PRIORITY
LONDON.—A peculiarly-shaped package was given top priority at London airport. Labelled "urgently required, handle with care," and addressed to a Mr. Sen Chee-Wong of Hong Kong, the package contained a shiny top hat.

"RED LETTER DAY" AT PANMUNJOM—A member of the Communist liaison team at Panmunjom, Col. Chang Chun San "opened his case" prematurely when an accident to his portfolio scattered his documents about the area. Newsmen pick up the papers as Col. Chang, (left), smilingly gathers them in. Communists' compromise proposal to end the war along a line only two miles from cease-fire sought by U.N. negotiators has bolstered Allied hopes for a Korean truce.—Central Press Canadian.

NATIONAL HEALTH MINISTER ENDORSES SEAL SALE

The Hon. Paul Martin, Minister of National Health, today issued a statement endorsing the Christmas Seal Sale of the Alberta Tuberculosis Association as follows:

"During the past few years Canadians have been in the happy position of being able to observe a tremendous decrease in the number of lives lost to tuberculosis, a disease once commonly referred to as 'the white plague.' What was 10 years ago a leading killer has become a lesser scourge owing, in great part, to increased facilities for diagnosis and to improve diagnostic equipment, particularly mass X-rays. To the voluntary tuberculosis associations goes much of the glory for this winning fight over an age-old enemy. Since the work of the Alberta Tuberculosis Association, and of the other Provincial associations, depends so largely for its success upon the proceeds from the sale of Christmas Seals, I consider it a privilege to heartily endorse your association's annual appeal for funds.

Every citizen who buys Christmas Seals is purchasing an investment in better health for all."

Christmas Seals have been mailed to some 250,000 homes in Alberta during the past week, and the Association is hoping to receive at least 100,000 contributions averaging \$1.85. Since many of the usual contributions amount to \$1.00 or less, it will be necessary for a great many Albertans to give well over that amount in order to reach the provincial objective of \$185,000.

Christmas Seal funds are spent on preventive services, health education, occupational therapy, rehabilitation, nursing and welfare services. Tuberculosis is gradually being reduced as cause of death but the incidence of the disease remains high. In Alberta there are at least 1,200 patients under treatment and there are probably another 1,000 unknown cases.

DO CANADIANS KNOW CANADA?

"You Canadians don't know what's happening in your country," a vis-

iting Texan told Jack Oberholtzer, Alberta's deputy minister of Industries and Labour recently.

Blair Fraser, MacLean's Ottawa Editor, writing in the current issue of the magazine, agrees with him in an article entitled "The Boom That Ran Away From Home."

"Eastern Canadians certainly do not" writes Fraser in support of the candid Texan's statement that Canadians don't know what's going on.

"It'll be five years in February since Imperial Oil's Leduc discovery set the Alberta boom rolling, five years in which the oil industry alone has poured seven hundred and fifty million dollars into western Canada, five years that have established the Canadian prairie as a major oil field of the world. Toward these developments the financial powers of eastern Canada have maintained a calm that resembles paralysis. Control of Alberta's natural resources, and the profits thereof, have very largely passed into American hands.

"Alberta has oil, coal and natural gas the ingredients of a chemical industry. A year ago an Ameri-

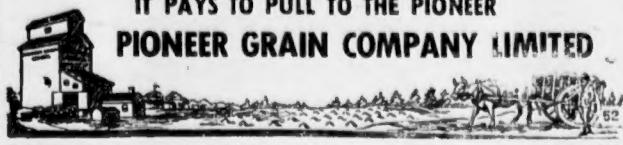

can firm sent out a group of its top men from New York to look the situation over. They stayed a few weeks, went back to New York, three months later announced plans for a new chemical plant that will cost at least fifty million dollars and may run to one hundred million if contemplated expansion is carried out.

"Long before that a Montreal firm had sent out two technical

men to make a careful survey. They spent six months in the field, then went back east and spent six months writing an exhaustive report. Their principals in Montreal have been studying the report for a couple of years. They may eventually decide to build a chemical plant in Alberta, but so far they are still trying to make up their minds.

It's a good time to Stop Wishing—and to Order One!

All the wishing in the world can never let you know how really wonderful it is to own and drive your own beautiful new Pontiac.

Wishing can never make you feel the pride and joy that come from sitting at the wheel of a Pontiac—nor give you the thrill of Pontiac's performance and the satisfaction of Pontiac's great dependability.

So, whether your heart's set on a Fleetleader Special, or Fleetleader Deluxe, or a luxurious Chieftain, this is the perfect time to put yourself in the Pontiac class. Come on in and talk it over—we'll show you how inexpensive, how easy and how satisfying it is to own the most beautiful thing on wheels—your own new Pontiac.

The Most Beautiful Thing on Wheels

Illustrated—Pontiac Catalina "6"

**Dollar for dollar and feature for feature
you can't beat a**

Pontiac

In all 1951 Pontiac Fleetleader Deluxe models you can have the wonderful ease and smoothness of POWERGLIDE—a proved, completely automatic transmission. There is no clutch pedal. In normal driving no gears ever shift, for POWERGLIDE is a torque converter drive. Wear is reduced, efficiency increased. Your car's life is longer, its trade-in value higher!

POWERGLIDE is optional equipment at extra cost on Fleetleader Deluxe models.

HYDRA-MATIC, the automatic drive that has been acclaimed by motorists for over ten years can be yours on any 1951 Pontiac Chieftain. Step on the gas to go, step on the brake to stop—that's all you do in normal driving with HYDRA-MATIC, the drive that has outmoded the clutch pedal entirely! And this year it features new Instant Reverse!

HYDRA-MATIC Drive is optional equipment at extra cost on Chieftain models only.

A Common Bond

ACCOUNTS OF THE VISIT of the Princess Elizabeth and her husband the Duke of Edinburgh to Canada filled the newspapers, were featured on the radio and formed the main topic of conversation among the people during the Royal tour of this country. Canada showed that in spite of her growing independence as a member of the Commonwealth of Nations, the ties with Great Britain remain strong and interest in, and respect for the Royal Family does not diminish. One aspect of the tour which may have impressed many Canadians was the manner in which it brought the country together in the welcoming of the Royal Visitors.

Learned Many New Things

Kapuskasing, in Northern Ontario, which may have been only a name to many, was described at the time of the royal visit as a modern-planned community with an important place in the Canadian economy. Many who had never seen Nanaimo, on the coast of Vancouver Island were able to visualize that old and rugged city, and warmed to the greeting extended to the Royal Couple by the school children who had gathered there from the surrounding districts.

Broadcasts from the prairies were heard by people to both the east and west who had never visited there, but were brought nearer by the description of the welcome given to the Princess and her husband as they passed through the West. This was true of the entire tour and there can be no doubt but that, in uniting to pay honor to the Royal Visitors, the Canadian people were reminded of the extent of their country and of the fact that each community had the same desire to welcome the future Queen and her husband and to show its esteem for them. It has been said that through the years the Crown was the symbol of unity which held the British Empire together. There have been many changes in that Empire, but the visit of Princess Elizabeth and the Duke of Edinburgh to Canada has shown that the Royal Family is still a powerful force in bringing people together in common thought and purpose.

FOR FIRST TIME

Alberta Girl Heads Boys' And Girls' Farm Club

TORONTO.—Dana Morkeberg, 18, Markerville, Alta., was elected president of the Boys' and Girls' farm club—the first time a girl has been president in the clubs' 21 years' existence.

Lawrence Brack, 17, Clark's Crossing, Sask., was elected secretary.

Sixty-three boys and 55 girls from many parts of Canada came to Toronto for National Club week at the Royal Winter fair.

Frank Duizer, 19, Aulac, N.B., came to Canada a little more than three years ago from the Netherlands. He learned English so well that he won the Maritime championship in public speaking.

His role at National Club Week was to judge cattle and get to know his fellow farm clubbers from other parts of the country.

Gail Haight, 16, Saskatchewan, is the sixth member of her family to take part in National Club Week. She has been milking cows since she was six years old and hopes to put her knowledge of cattle to good use here.

A team from Vancouver Island entered this year for the first time. It consisted of Jill Pickering, 16, and Marie Cullen, 18, both dairy cattle experts.

Leeks, first known in Mediterranean countries, have been known since prehistoric times.

Funny and Otherwise

She: "I hear your boy friend wants to settle down and get a home."

Her: "Well, he's got a good start. I gave him the gate last night."

"I want to buy my girl a present. What do you think she would like?"

"Does she like you?"

"Oh, yes, I'm positive she likes me."

"If she likes you, she'll like anything."

Bill: "What kind of a dress did she wear to the party last night?"

Will: "I can't remember, I think it was checked."

Bill: "You don't say! That must have been a real party!"

Irish corporal: "That's how 'twas. The bullet went in me chest and came out me back."

Newsman: "But how did it miss your heart?"

Irishman: "Me heart was in me mouth."

Dora: "Look out, Harry! That bull's making straight for us."

Harry: "Well, don't panic. Help me up this tree."

"What is Johnny," asked teacher, "is a comet?"

Johnny's reply was an absolute blank face. Teacher tried a new tack.

"What is a star with a tail?" she said.

Johnny's face brightened. "Mickey Mouse!" he answered promptly.

Mrs. X: "Is that telegram perfectly clear?"

Postmistress: "No, who's Rosie?"

"I don't see why you complain about the size of my bill. It's not as big as it might have been."

"That's right; I wasn't as sick as I could have been either."

Sunday school teacher: "Now children, you must never do anything in private that you wouldn't do in public."

Sammy: "Hurray! No more baths."

Advance Christmas Shopping In Korea

With Christmas-time "just around the corner," these Montreal servicemen in Korea took time to shop for their loved ones at home. PCF. J. B. Dumas, (left), Pvt. Paquin, (centre), and CSM M. Beauin, all of the 2nd battalion, Royal 22nd Regiment, are seen "examining the goods," at U.S. 1 corps rest hotel in Seoul.—Central Press Canadian.

Horse Coming Back In Value

Scarcity Given As Main Reason For Better Prices At Auction Sale

MOOSE JAW—Record prices which almost doubled those of last year were realized during the 29th annual horse auction sale at the Moose Jaw stockyards.

Altogether, 153 head passed through the auction ring bringing an average price of from \$60 to \$70.

A roan gelding owned by George Radatzge of Moose Jaw drew the highest price. The animal was purchased by B. H. Moore of Drinkwater for \$145.

L. "Red" Kere of Winnipeg paid the largest amount for a team when he bought a pair of sorrels owned by George McKenzie of Belbeck for \$240.

Auctioneer Laurie Drackett pointed to the scarcity of horses as the main reason for the high prices they were drawing. He noted too that many more individual farmers were among the buyers at the auction than in previous years. The opinion was expressed that farmers were anxious to buy horses again because of their increasing scarcity. They would be used mainly for transportation over muddy and snow-bound rural roads.

The increasing popularity of horse meat for food was responsible for the growing scarcity, officials stated.

An elephant in the Rome, Italy, zoo bore a 275-pound baby.

I Was Nearly Crazy With Fiery Itch—

Until I discovered Dr. D.D. Dennis' amazingly fast relief—Dr. D.D. Prescription. World popular, this pure, cooling liquid medication speeds peace and comfort from cruel itching caused by insect bites, rashes, athlete's foot and other itch troubles. Trial bottle, 43c. First application checks even the most intense itch or money back. Ask druggist for Dr. D.D. Prescription (ordinary or extra strength).

Advice When Skating On Thin Ice

If you ever plunged through ice into freezing water, what would you do? Scramble to your feet and try to rush away?

That, says the Red Cross, is where many make a fatal mistake.

In a release, the Red Cross said that if past records are any indication, many will die during the winter season from submersion or its after-effects.

Most will be children. And many will die in groups.

The Red Cross says many of these deaths can be prevented. Records show a skater in motion does not plunge straight down into the water when the ice breaks beneath him. Instead, he is tripped and sent sprawling. Then he usually makes his first mistake; he tries to scramble to his feet and skate away from danger. In getting to his feet he concentrates his weight on one small area of the already-weakened ice. Then he really breaks through.

If you are ever plunged into icy water, remember:

If the ice is thin all around you and no one is near to rescue you, break your way forward to shore or to solid ice.

If it is possible to climb out, lay your arms across the ice and kick your feet up and down to prevent them from jack-knifing beneath the break. Kick and wriggle your way up on the ice, then roll away to solid ice before standing up.

If you are ever plunged into icy water, remember:

If the ice is thin all around you and no one is near to rescue you, break your way forward to shore or to solid ice.

Drumheller School Division No. 30 NOTICE OF Annual Meeting For All Subdivisions

Take notice that annual meetings of electors of school districts in all subdivisions of this School Division will be held as indicated below:

Subdiv. No.	PLACE	DATE	Time
N-1	Three Hills Elks' Hall	Monday, Nov 26th	2 p.m.
2	Michichi Hall	Tuesday, Nov. 27th	2 p.m.
3	Delia FUA Rest Room	Wed., Nov. 28th	2 p.m.
N-4	Carbon Scout Hall	Thurs., Nov. 29th	2 p.m.
5	Administration Bldg., Drumheller	Friday, Nov. 30th	2 p.m.

At meetings marked (N), nominations for the office of divisional trustee will be received at any time prior to the hour of 4 o'clock p.m. The subdivisions in which Trustees are to be elected are Nos. 1, and 4.

Forms J and K, to be used in making and consenting to nominations, may be obtained from the secretary of your local District, or from the undersigned:

ALBERT W. POLAND, Secretary,
Drumheller School Division No. 30

W. Lobay, Supervisor of Crop Protection, Alberta Department of Agriculture, reports that during the past two weeks Norway rats have been killed in the areas of Compeer, Schuler, Monitor and Acacia Valley. In all cases the rats were found in grain fields at some distance from buildings. With established colonies of rats just east of our eastern border, these rodents are now moving around looking for winter quarter quarters.

Among these migrants will be females in search of suitable nesting places. Following settlement under a cosy farm building, their litters can be expected to arrive within a week or so, and unless prompt action is taken colonies can become quickly established.

Everyone is urged to be on the alert for both rats and rat signs. Hunters, harvester and children passing back and forth from school, can be of great assistance in keeping close watch for these pests. It is easier to kill a single rat than to clean up an established colony. If rats are killed or their presence suspected, the incident should be reported immediately to the pest control officer, district agriculturist or Field Crops Branch, Alberta Department of Agriculture, Edmonton.

Have you paid your subscription to the Carbon Chronicle? Check the label on your paper now. It bears the date to which you are paid. If your subscription is in arrears an early settlement would be appreciated.

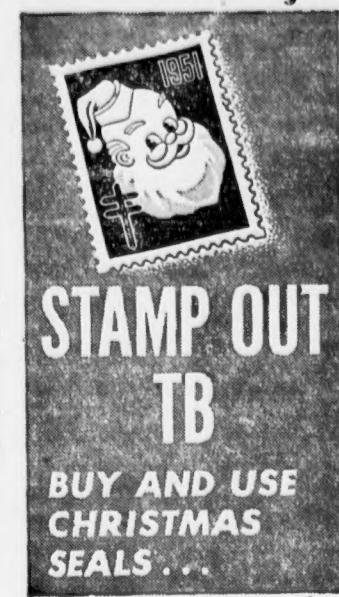

OUR LITTLE ENEMY

Flies linger on, well into autumn and, in mild weather, into early winter, losing none of their power to distribute disease germs on food, tableware and human skin. Only by screening windows and doors and using a good fly spray regularly can these pests be kept out of the home. It is also important to keep all food protected against flies and to cover all garbage containers so that the insects may not find breeding places or food supplies.

CONTAGION TAKES THE COUNT

In time past, children were victims of the frequent epidemics of whooping cough, diphtheria, typhoid and smallpox, until immunization protected them against these often fatal diseases. This preventative action has brought these diseases nearer to control. Vaccination has practically wiped out smallpox. Children should be immunized against these contagious diseases in early infancy and a "booster" dose given on entering school.

Using alternates for high-priced meats is an economical move that doesn't sacrifice nourishment but does help the budget. Cheese, fish, variety meats, peanut butter or dried beans are all good sources of proteins, minerals and vitamins and can be served in many attractive ways.

**Young men...
Here is Challenge
and OPPORTUNITY**

Training and experience in leadership are two of the most valuable assets you can possess, no matter what lifetime career you select. You may obtain both training and experience as a leader under a new plan whereby the Canadian Army is training young men with Junior Matriculation or Equivalent Educational Standard as Officers in the Active Force.

But there is a challenge in the standards you must meet — in the courses you take and pass before you can qualify for a commission.

And, there is opportunity in the privilege of leading Canada's soldiers at home and abroad.

If accepted you begin training at Camp Borden as an Officer Cadet to qualify as a Second Lieutenant in the Active Force. You will receive Second Lieutenant's pay while in training. When you are granted a commission you will then serve for periods of 3, 4 and 5 years as you choose under the Short Service Commission Plan. At the end of this service you may apply for a permanent commission.

To qualify you must be:—Single — Physically fit — Between 18 and 25 years of age and have a Junior Matriculation or Equivalent Educational Standard.

OUR COMPLETE SHORT STORY—**THE WIND**

**It Was the Crashing Down
of a Tree That Saved Henry**

By C. K. PRIEST

THE wind began to blow early in the morning, gently at first, but with gradually increasing force until the old leaves on the trees that hedged the dignity of Blackmore Avenue were as ruffled as the nerves of Henry Corlan, who stared out at the whipping branches from the security of his home.

He tapped a staccato tune on the pane while the wind played games with dust on the sidewalk below. Within the hour he and Lucille Morris would be leaving for The Island. Their chartered cabin cruiser, stocked for a weekend, waited at the anchorage. The carefully prepared telegram which demanded that he fly to a distant and imaginary conference already had been casually called to the attention of his wife.

Henry turned from the window and tiptoed into an adjoining room. He looked down at his sleeping wife with the cold compassion that a man grows to hold for a woman who shares his bed and board but not his heart. His wife did not awaken. Henry picked up his bag and left the house, leaning forward into the wind.

The wind of the morning had been off-shore, blowing against the tide, and when it died down the water quickly became smooth, so that Henry and Lucille made the crossing to The Island without incident. They dined late at the club there, dancing to the languishing music of a string orchestra which was still playing when they returned across the quiet water of the cove to their boat.

But now the wind returned. It began gently, sending small waves like messengers to lap at the white sides of the cruiser, and rocking it at the mooring, enough, so Lucille said, to make her ill. Henry cared for her, and after she had fallen asleep went to the forward cabin for the night.

By dawn, however, the wind was beating down over the hills to turn the cove into churning whitecaps. Henry arose and dressed carefully and went on deck, leaving Lucille still sleeping. There was no possibility of going ashore, nor was it safe to attempt a return crossing, the waves piled so high. Henry shrugged. The wind would die down eventually and time, in the circumstances, was not a consideration.

But the wind did not die down. In late afternoon Henry noted a group on shore observing the cruiser through binoculars, as if they were trying to read its name and number. Henry and Lucille stood up and waved cheerfully.

At dusk they went below and turned on the radio to hear the weather broadcast. The storm, it seemed, was worse than they had realized. Great damage had been done on the mainland. Trees and even buildings had been blown down.

Then the newscaster mentioned The Island, and listed the boats and their occupants that were marooned there by the storm. He mentioned Lucille and Henry with, so it seemed to them, a slight accentuation of names.

Henry knew that his wife expected him to travel by plane to and from the "conference" for which he had so carefully set the stage. He now saw her listening, concerned over his safety, to her radio at home — and hearing his name coupled with Lucille's. Henry turned to Lucille and said, attempting a smile and a shrug: "This spills everything!"

It displeased him when Lucille replied cheerfully, "Oh, well, we had to come out sooner or later, you know." undoubtedly, he thought, she thinks this situation will force me into some decisive action, such as asking for a divorce.

He studied Lucille, then, in the soft light of the cabin, from an entirely new viewpoint, considering her for the first time as a woman who might

Adela Rogers St. Johns
Compares Blue Bonnet
— Won't Go Without It!

Adela Rogers St. Johns offers an idea for you. Compare BLUE BONNET Margarine with any spread at any price. Like the famous novelist, you'll love the delicate, sunny-sweet flavor of this fine-quality all vegetable margarine. You'll appreciate BLUE BONNET's nutrition. And you'll welcome its real economy. So buy BLUE BONNET and get "all 3" — Flavor! Nutrition! Econom-e-e! Use it in cooking, on vegetables, as a delicious spread. BLUE BONNET Margarine is sold in two types — regular economy package with color wafer, and also in the famous YELLOW QUIK bag for fast, easy color.

West Growers Sweep Grain Awards At Fair

TORONTO, Ont.—Albert Kessel, Rosetown, Sask., took the world championship in rye at the Royal Winter fair with an exhibit of Prolific. Kessel was world champion in barley last year.

Reserve winner in rye is Chris Morck of Dixon, Alta., who won last year when Kessel was reserve winner.

Howard Roppel, 21, of Rockyford, Alta., won the world wheat championship with an exhibit of Marquis wheat.

Roppel is a member of the Rockyford Junior grain club which also provided last year's world titlist 12-year-old Ricky Sharp. The new wheat king took the reserve championship last year and in 1949.

The 1951 reserve championship went to S. J. Allsop of Red Deer, Alta., showing Reward wheat. Allsop took the reserve crown in 1948.

H. L. Stiegelmeyer of Normal, Ill., is the new world corn king. He de-throned E. W. Doulet of Hanna City, Ill., who won last year and in 1949.

Runner-up and reserve champion is Glen Smiley of Milford, Ill.

The barley title went to T. S. Brown and sons, Cassels, Alta., reserve, Harry V. Holt, Peace River, Alta., member of the Peace River Junior Farmers' Barley club.

The oats' crown went to Mathew B. Schnurer, Sangudo, Alta., reserve, Gordon S. Moyer, Elmswood, Alta.

Two new competitions were inaugurated at the fair—soybeans and forage crops.

R. H. Peck of River Canard, near Windsor, Ont., won the soybean championship and runner-up was Mr. Stiegelmeyer of Normal, Ill.

Ken Davie of New Westminster, B.C., won the forage-crop championship with an exhibit of red clover, also shown by runner-up A. C. Gilmore of Lulu Island, B.C.

Old Age Pension Will Be Taxable

OTTAWA.—Hon. D. C. Abbott, Finance Minister, said in the Commons that the Federal old-age pension of \$40 a month, starting January next, will be subject to taxation.

He told George Cruickshank (I—Fraser Valley) that the pension will be regarded as income for tax purposes, but probably few of the pensioners will fall within the income tax brackets.

The pension will total \$480 for a single person. The income tax exemption for a single person is \$1,000.

**ONLY BARE ESSENTIALS
ON LIVESTOCK CERTIFICATES**

A standard registration certificate applicable to all breeds of livestock and acceptable to all breed associations with information reduced to the bare essentials was the main proposal suggested last weekend at a joint meeting of delegates of about 25 breeders' associations of the Department of Agriculture.

The new arrangement, if endorsed by the associations at their respective annual meetings, will result in a simpler and prompter livestock registration service on the part of the Canadian National Live Stock records to all Canadian breeders. On the other hand, associations themselves will have a larger share of the responsibilities which have piled up with time and, for the last 45 years, have been assumed in most cases by the Canadian National Live Stock Records Office.

Specific proposals adopted at this Ottawa meeting and which again will have to be submitted to the breeders can be summarized as fol-

lows:-

(1) The inclusion on registration certificates of the minimum of information required to establish identification and ancestry.

(2) The use of standard certificate of registration by all associations.

(3) The discontinuance of the placing of special deposits to the credit of an association by the Canadian National Live Stock Records Office.

(4) The transfer from the Records Office of such duties and services as may be adequately conducted by association secretaries.

Additional services now given include collection of membership fee arrears; preparation of membership list for the annual meetings; interpretation of inaccuracies in constitution and by-laws; settlement of disputes among members etc.

The adoption of the above proposals would necessitate adoption of amendments approved at the meeting stipulates that the Record Office should cease to act as a banker and lawyer for associations; that

its responsibilities should be limited to the issuance of short pedigrees. Longer pedigrees would be provided by the association, the fee to be charged by them for such a service being in accordance with the amount of work involved in each case. No changes have been made to the article dealing with the conditions of withdrawal of an association from the affiliation.

Department and Records officials would continue to be at the disposal of associations and members for advice on any problem related to new responsibilities assumed by associations.

WORLD POPULATION

The latest estimate of the human population of the world, as made by the United Nations World Health Organization, is 2,400 million.

The increase in the last 50 years is placed at 826 million people. The current increase is placed at 60,000 a day.

In a newly published book entitled "The population of India and Pakistan", by Kingsley Davis, the

joint population of the two countries is estimated at 420 million.

Mr. Davis, who is director of the Bureau of applied social research at Columbia University, says that if the present population increase in India and Pakistan is continued, by the year 2005 it will reach 840 million.

This is Canada's 25th nationwide Christmas Seal Sale to obtain

funds for the prevention of tuberculosis. As early as 1908 individual Tuberculosis Associations in Canada conducted Christmas Seal Sales, but in 1927, this became the accepted method of obtaining funds for the prevention of tuberculosis.

A lady travelling with a friend on the airlines said to the pilot: "Now don't go faster than sound. We want to talk."

More About Skating

Many things make up that most important of hockey abilities—skating. Good skating is more than just a knack of moving fast down the ice.

Speed helps, of course, but it isn't enough. You have to be able to shift and cut both ways. You have to be able to stop on a dime. You have to be able to accelerate fast, and you have to have good balance so that the other fellow can't knock you down. You also have to be strong enough and well-conditioned enough to keep skating hard all the way through a game.

Few hockey players have all these abilities. Some can shift and cut in from a wing—but only one way. This usually keeps them in the minor leagues. Some look pretty, but spend a lot of time on the seat of their pants because they can be knocked down too easily.

The ground work of skating ability is put in while the athlete is young. Everybody can't be a Gord Howe, Milt Schmidt, Red Kelly or Maurice Richard. But everybody can be a "Red" Horner, in one respect.

Hornor, once one of the most feared defencemen in the N.H.L., was as awkward as they come when he first tried to break in. But he worked for month after month on his skating, and eventually became an extremely effective, if not graceful, skater.

We started this series on skating last week, and described a few fundamentals. Here are some more.

Knee Action: Flexible, relaxed knees are extremely important. Stiff knees cut down shiftiness and the ability to cut in from the wing. The only time the knee should be straightened out in the skating action is at the end of the thrust by the rear leg as it drives the body forward.

The skater should always try to keep the knee ahead of the foot.

Foot Action: The foot should not be lifted farther from the ice than necessary. Players who kick their feet up behind them are not only

wasting energy and losing drive, but are probably skating too high for good balance.

Stride: The length of the stride depends largely on the flexibility and length of the muscles you use, especially those of hips and thighs. This is one reason a hockey player must be flexible. It is impossible for him to take long strides efficiently if these muscles are short. There is no set rule for length of stride. The simplest system is to take a stride which seems comfortable. If trying for longer stride, reach with your knee (not your foot) and concentrate on gliding a little longer on your forward skate before your foot starts moving out to the side for another thrust.

Next week, we'll give you some tips on cutting and shifting, with emphasis on developing the ability to go both ways.

In The Hockey Handbook, a 160,000 word instructional guide written by Lloyd Percival, an entire chapter is devoted to the subject of skating and its development. This book can be obtained from Sports College for \$3.50 plus 10c postage.

Many other valuable services, including special instructional literature in all sports, is available from the College. To join free of charge, just write to "Sports College, Box 99, Toronto 1, Ontario," and mention this newspaper. Listen every Saturday afternoon to the Sports College radio session over stations CBW, CFGP, CBK and CBX.

World Happenings Briefly Told

Argentine wheat shipments for the first seven months of the year were off about 100,000 tons from the year ago period, private sources reported.

London jewelry manufacturers are cashing in on the royal tour of Canada by selling gold brooches, modeled in the shape of the Canada goose.

Captain Scott's Antarctic expedition ship, the Discovery, is being fitted with new masts of spruce supplied by a Canadian lumber firm. Dry rot has weakened the old masts.

The famous clock in St. George's Tower, Canterbury, England, damaged by German incendiary bombs in 1942, has been saved from demolition. A fund of \$600 has been raised to repair it.

A radar device may be installed to detect intruders at the London airport, which is too big to permit adequate fencing. One "trespasser" said he didn't even know he was driving on an airport.

Edwin Chown, 68, was the only competitor using a horse plow but he won the plowing contest at Buckingham, England. Giving his horses a pat he cast a scornful glance at the tractors used by his rivals.

Princess Elizabeth and the Duke of Edinburgh will arrive in Fremantle, Western Australia, March 1 next year, the date originally planned for the King's tour of the country, it was announced at Canberra.

Visitors to New Zealand in future will be marked men and women. The government tourist department has issued a sticker with a picture of a kiwi—the national bird—to be put on baggage. The label also bears the words "Visitor to New Zealand".

Best age for a woman to have children is estimated at 20 to 24.

No New Outbreaks Of Newcastle Disease Reported In Saskatchewan

REGINA—There have been no new outbreaks of Newcastle disease among Saskatchewan poultry since Aug. 16, Dr. N. D. Christie, district veterinary inspector of the health of animals division of the Dominion agriculture department, reported.

Dr. Christie said Saskatchewan poultry producers lost plenty in this year's outbreak but the situation was not serious as compared to other areas.

"It cleared up faster than I expected," he said.

The only method of controlling Newcastle disease is to inspect the flocks and destroy all infected birds and eggs. The Dominion government has been paying compensation

to the poultry producers for their losses.

Dr. Christie reported the testing of cattle for tuberculosis under the restricted area plan has not advanced as quickly as hoped because of the bad roads due to the wet season. He said that it has been found that there is very little tuberculosis among Saskatchewan cattle.

Manitoba Lady Curlers To Play Provincial Tourney

WINNIPEG.—Plans for Manitoba's first ladies provincial curling championships were laid at the semi-annual meeting of the Manitoba Ladies Curling Association.

The playdowns will be along the lines of those already organized in Saskatchewan and Alberta.

The province will be divided into two districts which have not been decided. Dates will be set later.

Association officials said it hoped eventually to stage western Canada championships with representatives from the four western provinces competing.

Synopsis of By-Law No. 207
Village of Carbon

Every occupant, and in case there is no occupant, the owner of the property fronting or abutting on any street where there is a sidewalk, shall keep the said sidewalk free and clear of snow and ice whenever the same shall accumulate thereon, such snow or ice to be removed forthwith.

No person shall sprinkle, spread or place any salt or like substance on the sidewalks with the intent or purpose of melting or dissolving any snow or ice which may have accumulated thereon.

No person shall cause injury to any sidewalk by striking, picking or cutting with any metal instrument whatever, whether engaged in removing snow or ice from such sidewalk or not.

If any person referred to in the by-law neglects or fails to clear the sidewalks as aforesaid, the said village is empowered to remove the said snow or ice and the costs thereof shall be charged against the owner of the property, and in addition to any fine or penalty imposed by this or any other by-law of the Village of Carbon, Alberta.

ONE IN TEN

A million Canadians now have jobs in manufacturing. Ten per cent of these are in the primary textile industry. (The latest Dominion Bureau figures are 1,080,000 in manufacturing and 104,000 of these in primary textiles.)

Besides leading all other Canadian industries in numbers employed in manufacturing, primary textiles also is away ahead in the size of its payroll. It is up among the leaders in providing jobs for women and in being well spread out through the smaller communities.

Dominion Textile is a considerable part of this basic textile industry.
